**15** Describe the quantitative effect of the organizational action on the basis of the security in the hands of a U.S. taxpayer as an adjustment per share or as a percentage of old basis ▶ **Distributions paid in excess of current and accumulated earnings and profits ("E&P") of a corporation reduce the basis of the shares of the corporation pursuant to Internal Revenue Code ("IRC") Sections 301(c)(2) and 316(a).**

**During the year-ended December 31, 2025, CWEN made quarterly cash distributions to the holders of its Class A and Class C common stock. Based on the financial data currently available, the distributions are expected to be non-taxable return of capital, thereby reducing each shareholder's basis by the amount of the distribution.**

**16** Describe the calculation of the change in basis and the data that supports the calculation, such as the market values of securities and the valuation dates ▶ **At this time, and based upon reasonable assumptions by CWEN, the amount of the distributions paid per Class A and Class C common stock that should reduce the basis of each share of Class A and Class C common stock held by each shareholder on the date of payment as CWEN is not expected to have any E&P (current or accumulated) as of December 31, 2025 (pursuant to the applicable Treasury Regulations under IRC Section 6045B).**

**If these assumptions turn out to be incorrect, CWEN will file a corrected Form 8937 within 45 days of such determination.**
